DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title has been amended: A Voltage Controlled Oscillator with Switched Tuning Capacitors.

Statement of Reasons for Allowance

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Applicant admitted Prior Art discloses a voltage controlled oscillator as recited in the claim 1 except a first switch and a third switch. None of the cited references discloses nor suggests the claimed invention including "said first and third switches cooperate with each other to switch both the other electrodes of said second and third variable capacitors between floating and being subjected to said third potential", as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
